GENERAL INFORMATION

All hikes leave from the first, left (when entering from MountainView Blvd.) parking lot in front of the MountainView Clubhouse (just east of the tennis courts), unless otherwise noted. Voluntary driver donations will be shown in the "Hikes Offered" table in the Club Newsletter. These costs will change from time to time with significant fluctuations in gasoline prices. There may be other fees for tram shuttles, entry to areas such as national parks, monuments, wilderness areas, special tours and exhibits, permits, state parks, overnight stays, etc. To ensure fee amounts are current, they will also be listed in the newsletter or provided by the Hike Guide when one signs up for a hike. Hike Guides are encouraged to split costs between drivers for drop-offs and/or unequal passenger loads. The hike descriptions which follow alert hike guides and hikers to the possibility of additional fees where expected but not known.

Hike names are arranged alphabetically to make finding hikes easier. However, a table is included in Section 6 showing the hikes sorted by hike number. Note that names involving numbers have been converted to their alphabetical counterparts. An example of this is where the "50-Year" Trail has been listed as the "Fifty-Year" Trail.

Hikes are usually listed alphabetically according to the destination or the major canyon/mountain/feature visited. Examples of this would be Pusch Peak and Pontatoc Ridge. In some cases, the listing refers solely to the trail name, but that normally occurs where there is no distinct, geographically significant feature visited during the hike. Examples of this would be the Linda Vista Loop or Esperero Trail. Exceptions to this approach are the hikes that take place in the Superstition Mountains near Phoenix, Arizona, and hikes solely or mainly along segments of the Arizona Trail. Superstition Mountain hikes are all grouped under "Superstitions" since Saddlebrooke residents are assumed to be less familiar with specific trailhead names in that mountain range. Many of the hikes in the Tortolitas are similarly grouped. Although many of the hikes on Mt. Lemmon are listed under that name, there are several others listed under their destination or trail name, such as Guthrie Mountain, Incinerator Ridge, Marshall Gulch/Aspen Loop, or Red Ridge/Oracle Ridge. It would be confusing to force all these hikes to be listed under the banner of "Mt. Lemmon". Also, guides (the primary users of the Database) are used to looking for these names when deciding which hikes to lead.

In this edition of the database, descriptions of each of the 43 passages of the Arizona Trail have been included as day hikes. The narrative assumes the hikes proceed from south to north, following the convention used by the Arizona Trail Association (ATA) web site, but all of them could be completed north to south. The reality is that many passages are too long or arduous to do as day hikes, and some involve complex logistics due the remoteness and inaccessibility of access points. This is the result of efforts by planners to provide a high quality wilderness experience for people hiking the trail. Several hikes that cover a portion of the Arizona Trail, either in combination with other nearby trails or as stand-alone hikes, may be found in other areas of the database. When this occurs, the author has attempted to provide a reference to these other hikes to assist in planning hike logistics. An example of this is the Wilderness of Rocks Trail, which is now (at least temporarily) included as part of Arizona Trail Passage 12, Oracle Ridge (from Romero Pass to the American Flag Trailhead). Parts or all of the WOR Trail are included in several long standing and popular hikes known by other names (see hikes 411, 412, 413, 414, and 497).

The reader will also find other hikes under the Arizona Trail "banner" that cover a portion of a particular passage. An example of this is where a new hike description for the Black Hills Passage (#14) is included, but the north and south legs of this same passage are described as hikes numbered 21 and 22 immediately following. This is done mainly to leave hike descriptions where guides are used to seeing them, and to avoid changing the numbers and names of hikes which are linked to statistics kept by the club.

Persons and guides planning to hike one or more sections of the Arizona Trail should consult the ATA web site for details about current trail conditions and routes since changes periodically occur due to fires, attempts to improve the wilderness experience, changes in land ownership (which may affect access) or other status. In fact,

changes are being considered for the route leading to the top of Mt. Lemmon from Prison Camp, so check periodically with the ATA web site for the latest information.

Most Arizona Trail hikes are completed as key-exchange hikes and sometimes involve complicated logistics. Guides should work with drivers to derive a fair driver donation from each person that results in adequate compensation to drivers who risk their vehicles on frequently very rough roads to reach remote trailheads.

The hike descriptions for Arizona Trail hike descriptions include statistics from the following:

- Hike Distance numbers are from the ATA web site descriptions,
- Trailhead Elevations and Accumulated Gains for each passage are from elevation profiles prepared using National Geographic TOPO! software with GPS data downloaded from the ATA web site (It should be noted that TOPO! generated distances and elevations underestimate the actual vlaues, because of the segmented way calculations are performed. Variances of -5 % are not uncommon, although the exact error depends on the number of waypoints used and the scale for the image displayed on the screen.),
- Round Trip Distances (driving) are the sum of the distances to the nearest and farthest trailheads (from Saddlebrooke), and
- Net Elevation Changes are also from TOPO! profiles, defined as the difference between the lowest and highest elevation reached during the passage.

The "Guide" book issued in 2005 (*Arizona Trail: The Official Guide*, Tom Lorang Jones, et. al., 2005) has a great amount of information about the Arizona Trail and was a herculean effort at that early stage of the trail's development to capture its description. However, it is badly in need of an update. Mileages of 24 of the 43 passages have changed between 2005 and the July 2011 version of the ATA web site. The names of at least three passages in the Guide have changed: 6, 7, and 8. Only one passage is listed as incomplete (Passage 16, White Mountain), while several were under construction when the Guide was published, and changes to trailheads have occurred to Passages 5, 6, 7, 8, 11, 12, 15, 16 and 17. Hikers planning to hike a portion of the Arizona Trail are strongly encouraged to consult the web site and heed the "Current Trail Information" posts by trail stewards which provide alerts and status.

The club recommends that the latest waypoints and/or tracks be downloaded from ATA web site (a link can be found on the SBHC Hiking Club web site) and plotted on a good topographic map (preferably 1:24,000 USGS). Tracks can also be loaded on many handheld GPSs. Elevation profiles should be generated to determine the level of difficulty that will be presented by a specific segment. Note that all data on the ATA web site is based on the WGS84 map datum, meaning that base maps and handheld GPSs should be similarly referenced.

HIKE RATINGS, PACE AND ELEVATION CHANGE

Ratings

Ratings are based on the following round trip distances and accumulated gains in elevation over the course of the hike. The hike rating is determined by one (or both) of the two values being exceeded. For example, if a hike exceeds the criterion for distance but not for corresponding elevation, the rating would be set for distance. In the hike descriptions that follow, both parameter values are exceeded for some hikes. However, that does not necessarily justify a higher combined rating.

Hike Rating	Distance (miles)	Accumulated Elevation Gain (feet)
А	>14	>3000
В	8 to 14	1500 to 3000
С	4 to 8	500 to 1500
D	<4	<500

Pace

Pace is described in terms of average speed in miles per hour (MPH) over the course of a hike from start to finish excluding lunch. The average speed, or pace, of a hike is affected by speed and length of stride, number of rest stops, incline, type of terrain, and trail conditions. The following four categories are used to describe pace in the newsletter:

Pace	Average Speed (MPH)
Leisurely	<1.5
Slow	1.5 to 2.0
Moderate	2.0 to 2.5
Fast	>2.5

Elevation Change

Three indicators are used in the hike descriptions to convey hike difficulty as it relates to elevation change: Net Elevation Change is generally the change in elevation obtained by subtracting the starting elevation from the highest (or lowest) point reached during the course of the hike, in feet. This estimate may be obtained from USGS maps or a global positioning system (GPS). If no destination is listed, which may be the case for loop hikes or point-to-point hikes, net change is defined as the difference between the trailhead elevation and the highest elevation reached during the hike. If net elevation lost between the trailhead and the destination, a minus sign is used to show that elevation is lost. If an elevation profile is available, which applies in this database to mostly the Arizona Trail hikes for which GPS tracks have been generated, the net elevation change is the difference between the highest and lowest points along the trail.

Accumulated Gain is the sum of all upward stretches of a hike as recorded by a GPS device over the course of the entire hike. Accumulated elevation gain is always a more accurate indicator of hike difficulty than net change in elevation.

Accumulated Loss, another measure of hike difficulty, is the sum of all downward stretches of a hike. Accumulated elevation loss is useful for some downhill hikes and is usually obtained with a GPS device. A cursory critique of the definition for "net elevation change" reveals that it is vague and imprecise and provides

limited insight into trail difficulty (which is more accurately described in terms of accumulated gain or loss (parameters that are measured by GPSs). However, accumulated gain/loss information is unavailable for many hikes in the database, so net change has, for the time being, been retained because it is the only statistic available.

Accumulated gains are always greater than net elevation changes, except for point-to-point hikes where the destination is at a lower elevation than trailhead elevation. In this case, the accumulated gain could be much

lower than the net elevation change. A good example of this is the hike from the top of Mt. Lemmon to Catalina State Park, which actually results in little gain but rather a significant accumulated loss. For loop and out-and-back hikes, accumulated elevation gains are usually greater, sometimes much greater, than net elevation changes.

SPECIAL CONDITIONS

Some hikes are further described in terms of trail conditions that result in those hikes being especially desirable or unsuitable for a particular hike rating. Club members will want to assess these special conditions in context with their level of fitness and personal preferences before signing up for those hikes. This is accomplished in the

Database by adding a"," to the letter rating to indicate the presence of a condition that may make the hike more daunting or difficult than suggested by the distance and elevation change alone,

Special trail conditions warranting a "" include

- a very rough trail,
- sustained steep climbing,
- water crossings requiring wading,
- loose rock which makes footing uncertain,
- exposure to heights or steep drop-offs,
- rock scrambling,
- significant bushwhacking thru difficult terrain, and
- boulder hopping.

On the other hand, a "③" may appear along with the letter rating to indicate an easier, smoother than normal trail or a more relaxed pace during the hike. These conditions would allow club members who may not be used to trail hiking to enjoy certain outings. Special trail conditions warranting a "③" include

- little aerobic challenge (i.e., frequent pausing to view exhibits or plants along the way),
- little climbing (i.e., hilly terrain which provides multiple ups and downs as opposed to sustained climbs),
- hikes that are primarily educational in nature, and
- very stable footing (such as a paved trail).

Special condition flags will appear in the Hikes Offered table and with each hike description in the Newsletter to alert club members when considering hikes. Club members should ask the Hike Guide about any special

conditions when signing up for a flagged hike. Note that the " \checkmark " and "O" are <u>NEVER</u> used to indicate a distinction of distance or elevation within a rating category¹.

Please remember that, even with the increased attention to special conditions, there is always a degree of subjectivity in their use to describe hikes. For example, many people would consider wading in a slow-moving stream (such as with the Aravaipa hikes) to be an enhancement rather than a detracting factor. Conversely, some people would consider significant exposure to heights a negative. The goal of their flagging in the database is merely to identify the special condition to individual hikers who can then decide what is preferable and acceptable to them.

Finally, a caveat. As with any rating system, it is difficult to devise a rigorous basis for flagging special conditions when those conditions rely to a great degree on mother nature. The most serene, small wash in dry weather can become a raging torrent following our famous Tucson monsoons. As usual, there is no substitute for

common sense, and it is counterproductive to label all hikes with wash/stream crossings with a """ flag if they are normally dry. It is strongly recommended that club members read the hike descriptions that are flagged with a """ before signing up, and, if relevant, the guides should be contacted about current conditions.

1 - Flags used to indicate special conditions use a font different from the rest of this document (which is Times New Roman).

The exclamation mark () is created by typing the exclamation mark using *Arial Black* font with bold and italicized type selected. The smiley face (③) character is created by typing an upper case 'J' using *Wingdings* font with bold type selected.

HIKE DESCRIPTIONS

Hike No.	Hike Rating	Hike Name	Hike Description	Driver Donation
1	A	Agua Caliente Hill	Agua Caliente Hill. Rating A. The hike has great panoramic views of Tucson, and the Rincon and Santa Catalinas. The trail starts climbing immediately from the Camino Remuda Trailhead. The trail continues up and down for approximately two miles to a water hole. From here, the trail climbs and then drops into a wash. Next is a steep climb to a ridge and a junction with old jeep FS # 4445, about three miles from the trailhead. It is another 1.5 miles to the top of Aqua Caliente Hill. The return is via the same route. Hike 8.5 miles; trailhead elevation 2930 feet; net elevation change 2430 feet; accumulated gain 3045 feet; RTD 75 miles.	\$6
2	Α	Agua Caliente Hill / La Milagrosa Ridge / Molino Basin	Agua Caliente Hill / La Milagrosa Ridge / Molino Basin. Rating A. In this key exchange hike, one group will start at the Camino Remuda Trailhead, climb to the saddle, and summit Agua Caliente Hill. The group will then descend to the saddle, merge with a trail going north to Agua Caliente Canyon, connect with La Milagrosa Trail, hike northeast to the intersection with the AZT, then head northwest toward Molino Basin on Catalina Hwy. The other group will do the reverse. Hike 14.2 miles; trailhead elevations Camino Remuda/Molino Basin 2930/4480 feet; net elevation change 2430 feet, accumulated gain: hill to basin 4720 feet, basin to hill 3300 feet; RTD 97 miles.	\$7
3	A	Agua Caliente Hill and La Milagrosa Trail	Agua Caliente Hill and La Milagrosa Trail. Rating A. The hike begins at the Camino Remuda Trailhead and follows the Agua Caliente Trail. Hikers climb to the saddle, then to the summit of Agua Caliente Hill. The climb from the saddle to the summit is more intense than earlier portions of the trail. The last 1.5 miles has loose rock, gravel, and small boulders. Hikers reach a false summit about halfway up this section. From the true summit, there are panoramic views in all directions, including the Catalinas, Rincons, Galiuros, and Pinalenos. We descend to a saddle, then head northeast on a merging trail toward Agua Caliente Canyon. From the Canyon we ascend to La Milagrosa Trail and finish by proceeding east 2.5 miles to the Horsehead Road Trailhead. This hike can be completed as a key exchange or by placing a shuttle vehicle. Hike 11 miles; trailhead elevation 2930 feet; net elevation change 2580 feet; accumulated gain 4444 feet; RTD 75 miles.	\$6
4	С	Agua Caliente Hill from Redington Pass Road	Agua Caliente Hill from Redington Pass Road. Rating C. The trailhead is reached by driving 4.8 miles east on the Redington Pass Road from the end of Tanque Verde Road. High clearance vehicles are needed. Parking is available near some corrals on the left side of the road. The trail begins after passing through the gate onto FR # 4441 (if the gate is locked, go under the barbed wire fence). The trail proceeds up an old 4WD road, which involves lots of ups and downs, and rocky areas. In about 0.5 mile, the trail crosses a stream bed. A sign at that point indicates that in three miles, there is a locked gate and private land. It's about 3.5 miles to this point from the trailhead. Hike 7 miles; trailhead elevation feet; net elevation change 800 feet; accumulated gain feet; RTD 96 miles (dirt).	\$9

		(Passage 14)	the trail proceeds generally northwest to a pipeline road intersection	
		(with a large white steel gate on the east side (the gate signifies private	
			land owned by El Paso Gas). The trail continues in a northerly	
			direction for the next 9 miles. It meanders up and over the ridges of	
			the Black Hills with 360° views as it passes through three gates and	
			crosses several ranch roads. At approximately the seven mile point,	
			there is a one mile section with numerous drainages in all directions.	
			Follow the numerous carsonites while navigating this terrain. Soon	
			after, the trail turns in a northwesterly direction, climbs the last of the	
			ridgelines, then rapidly drops down to the confluence of Camp Grant	
			and Bloodsucker Washes. Once across both washes, head to the ranch	
			road on the north side of Bloodsucker wash. The two-track road leads	
			to Beehive well/tank at the edge of Putnam Wash. The trail heads	
			northwest, passing just west of Antelope Tank and just east of	
			Antelope Peak and arrives at Freeman Road. The Freeman Road

From the Schultz Tank parking lot (Sunset Trailhead) the route proceeds north on the Weatherford/Kachina trail for a short distance and then turns left (west) on new single-track trail. It works its way west- northwest across the Fort Valley Experimental Forest for about 7.4 miles to the Snowbowl Road. After crossing Snowbowl Road, it climbs steeply for the next 4 miles, gaining about 1,400 ft to the bottom end of the Aspen Loop connector trail. From here the trail passes Lew Tank, and the junction with the Bismarck Lake TH access trail, and Bismarck Lake. The trail then trends northward down the slope, across several two-track roads and through an aspen grove to FR-418. It heads north-northwest around the base of the White Horse Hills, joins a two-track for a short distance, and then leaves the road and works its way northeast up to FR 514 and Kelly Tank. From the Gordon Hirabayashi (Prison Camp) Trailhead the trail heads west on a dirt road, becomes a trail then reaches the wilderness boundary. Now on the Sycamore Reservoir Trail (#39), the route passes the reservoir and continues along Sycamore Canyon. It crosses the canyon and then drops down to and follows the East Fork of Sabino Canyon. The trail crosses Box Camp Canyon and then begins the long uphill along the West Fork of Sabino Canyon. It passes Hutch's Pool and the Cathedral Rock Trail (#26). The passage end is reached at Romero Pass. Unfortunately, there is no trailhead at Romero Pass, leaving the hiker to continue several miles to Catalina State Park or up the mountain to either Radio Ridge or Marshall Gulch. The low rating for this hike is therefore quite misleading. You should plan carefully before attempting this passage as a day hike. The route passes the trailhead, heads over to Cave Creek, descends into Fish Canyon and then heads northwest to Kentucky Camp. It goes through the camp area, follows the Kentucky Camp Road and then works its way up Sucker Gulch. It goes past Granite Mountain, through Ophir Gulch and then turns on to FR 165. It descends to Enzenberg Canyon, climbs up to a road, crosses California Gulch and then crosses FR 62. After a couple of small ridges the trail reaches the upper end of Oak Tree Canyon. It follows this canyon down to a point about 3/4 mile from Highway 83. The Santa Rita passage is rich in mining history, much of which can be observed from the trail. The renovated Kentucky Camp is an early 1900's base for Stetson hydraulic gold mining company, which never saw production. Remnants of an aqueduct to provide pressurized water, along with interpretive signs, can be seen along the trail. The hike is moderately difficult. 		East Approach	According to legend, the peak marks the center of the universe and the home of Elder Brother I'itoi, who taught the Tohono O'odham how to	
		Approach	live in the desert. The hike proceeds up Thomas Canyon to a	
			prominent, wooded saddle (elev. 6340 feet) directly northeast of the	
			7730-foot peak. The first portion of the trail is along a road that passes	
			Clemente Windmill and ends near a ranch house with a corral and	
			water tank. The trail continues along the canyon wash past a second	
			water tank. The train continues along the canyon wash past a second water tank to an elevation of about 5400 feet, then switchbacks up a	
			-	
			steep slope to the saddle. Ambitious hikers may turn southwest toward the peak and climb further to a prominent notch, beyond which	
			technical climbing skills and equipment are required. Note: the views	
			from the saddle to the north are obscured by trees, thereby forcing a	
			higher climb if views are important (and you have the energy). The	
			trail beyond the ranch house and corral is rarely used and is likely to	
			be overgrown with cat's claw and other thorny plants, so dress	
			defensively. The last kilometer of the trail is very steep, fraught with	
			loose rock, and difficult to follow. Just keep heading toward the	
			saddle and watch for the infrequent cairns. A good GPS track and map	
			may be found at

		Ghost Town	the Galiuro Mountains, was established by E. R. Sibley to serve	
			Bunker Hill Mining District. Because of its canyon setting, the town	
			was built in tiers. By 1910, there were over 200 residents. There was a	
			stage line, a physician, and about 50 buildings including a school	
			house, a general store, and a three-story 20-room mansion, home of	
			the Sibley family. The ruins include mine buildings, an iron bridge,	
			various foundations, and the mostly collapsed Sibley Mansion about	
			1.5 miles upstream from the mining area. The mines declined quickly	
			and closed in 1917. A post office operated from 1906 to 1947 after	
			which all the buildings were abandoned. Copper Creek is reached from Mammoth via a rough 10-mile road. The rocky Bunker Hill	
			Road eventually gains 1800 feet then deteriorates as it drops steeply	
			toward the narrow canyon of Copper Creek, through which a stream	
			flows year-round. The goal is to locate Sibley Mansion, but we will at

175	С	El Capitan	El Capitan Canyon (upper). Rating C. This beautiful canyon is	\$10
		Canyon	advertised in the Arizona Milepost Travel Guide as being Southern	
		(upper)	Arizona's only slot canyon. Investigation reveals that it is not a true	
			slot canyon, but is definitely very narrow with steep walls on both	
			sides. We drive 18.1 miles north of Winkelman and park on the east	
			side of the road by a yellow sign reading "Watch for animals next 10	
			miles". The hike descends along an old bulldozed road about 200 feet	
			to a stream bottom. From there, hikers walk to the bottom of the	
			canyon, over lots of rocks and several short waterfalls (given	
			sufficient rain). We turn around after about 2 miles and return by the	
			same route. Needless to say, this hike cannot be done if there is	
			significant water in the canyon, or if thunderstorms threaten a flash

			head when viewed from I-19. The hike starts from the Aqua Caliente Trailhead (see driving directions), follows a trail to the Quantrell	
			Mine Road, and then turns eastward on the abandoned mining road	
			which winds around Chino Basin to Chino Canyon. Around the	
			corner into Chino Canyon is the first unobstructed view of Elephant	
			Head. A hundred yards east into Chino Canyon the trail descends very	
			steeply 500 feet into the canyon to a stream crossing with pools of	
			water. This is a pleasant place for a rest break before climbing 800	
			feet to the ridgeline to the north. At the ridgeline, we turn to the west	
			and follow a rocky trail with many steps-up and narrow passages	
			along the final ascent. A few places are very steep and exposed. Four-	
			point rock scrambling is required along the final 1/4 mile. Besides the	
			magnificent 360-degree view from the top there is a whimsical display	
			of miniature elephants which are fun to view and arrange. Return via	
			the same trails. After climbing out of Chino Canyon, there is an

189	A!	Finger Rock	Finger Rock Guard. Rating A!. The hike begins from the Finger	\$4
		Guard	Rock Trailhead at the north end of Alvernon Way. Finger Rock Guard	
			is the large rock formation to the east of Finger Rock, a well-known	
			landmark that can be seen from many places in Tucson (and from	
			Saddlebrooke). The hike begins with the first 2.5 miles and 2200 feet	
			accumulated gain of the Finger Rock Canyon Trail, which leads	
			eventually to Mt. Kimball. At the point where the trail turns northeast	
			toward the Linda Vista Saddle, the trail descends a steep 200 feet into	
			Finger Rock Canyon. The trail continues up a faint, steep and, in	
			many places, slippery path to the saddle between Mt. Kimball and	
			Finger Rock. From there, the trail turns southwest toward the rock	
			guard. Rock scrambling and rock climbing are required to reach the	
			summit 450 feet above the saddle. There is significant exposure to	
			heights and steep drop-offs along the last few hundred feet of	
			elevation. Bring extra water. Call to discuss with the hiking guide.	
			This is a difficult hike but the fantastic views from the summit make it

202	D/C	Dwelling	Rating B/C. This is an overnight (1 or 2 nights) excursion to the Gila	ψτυ
		National	National Forest in New Mexico. The group will visit the extensive	
		Monument /	cliff dwellings in the monument and then hike along the Middle or	
		Gila National	West Gila River Trails. The forest is one of the largest (3.3 M acres)	
		Forest	in the U.S., and includes more wilderness acreage than any other in	
		- 01 000	the southwest. The forest terrain rises above the desert country and	
			abounds with cactus, juniper, pine, spruce and aspen. It also supports	
			numerous species of wildlife throughout. The Continental Divide	
			meanders through the middle of the forest for 170 miles, which also	
			served as a stronghold for the Apache warrior, Geronimo. The trip	
			will be very flexible depending on the make-up of the group.	
			Typically, we would drive (4 hours) over and do some sight seeing in	
			the Silver City area the first day. Hikers could stay overnight in a	
			motel/hotel in or near Silver City or use a nearby camp site for those	
			wanting to use tents or RV. The second day involves a drive up to	
			visit the cliff dwelling and hiking trail area (42 miles-2 hours). The	
			hike trails and distance will be determined at the cliff dwelling, but	
			will range in the C to B categories. After hiking, some may want to go	
			back home that night. Others may choose to stay another night and	

			hike other trails or do scenic day trips the 3rd day. The trip will be limited to 16 people/4 vehicles. All motel-meals-fees-etc. will be the responsibility of club members. RTD 548 miles, plus 12 touring miles.	
203	C ©	Gilbert Ray Loop	Gilbert Ray Loop. Rating C (a) The hike leaves from the Gilbert Ray Trailhead in Saguaro National Park – West near the Gilbert Ray Campground (next to Old Tucson Studios). The route leads south toward the Avery Bryce Trail, which hikers will follow west for 1.8 miles, northwest along Prospector Trail for 0.6 miles, and northeast along Well Road Trail for 1.7 miles. At this point, the group will follow McCain Loop Road for a short distance, and then turn south back to the Gilbert Ray Trailhead. The entire loop is basically flat with many small saguaros thriving under the protection of Palo Verde trees. Across from the Superstitions is a little noticed range called the Goldfields, bordered by the Apache Trail Highway on the south and Saguaro Lake and the Salt River on the north. This hike is about 40% off trail (dress accordingly). From Meridian Trailhead, we go west, then north, on the Pass Mountain Trail for 2 miles looking for rock formations resembling the Good Shepherd and a medieval castle. We veer northeast at the Wind Cave Trailhead, continuing for 1.25 miles, climbing until we reach the yellow rhyolite formation that can be seen all the way from Phoenix and, shortly, the Wind Cave. As we turn south, the trail gets steeper and rockier and we then take the northern approach to Peak 3127. Here we leave the trail to hike along the Ridge to the Notch. North of the Notch, the Ridgeline becomes a gentle walk in the sky, interrupted by rock climbs to Peaks 3305 and 3312 where we are rewarded by outstanding views. Leaving the Ridgeline, we take a moderate decent eastward to a wide level spot on the Pass Mountain Trail, and then 2.25 miles back to the trailhead. The Goldfield Mountains are west of the Superstitions, and are bordered by the Apache Trail Highway on the south and Saguaro Lake and the Salt River on the north. Once a mining district, these mountains are one of Arizona's least known scenic treasures which offer advanced hiking opportunities. 			state. Public access is allowed through the King's Anvil Ranch only	
			during the months of Sept. through Feb. After reaching the starting	
			destination, we begin the hike on a primitive road through jumbled	
			granite boulders. In an area of varnished boulders, we will search for	
			stone metates and pictographs. After about 2 miles, the road ends	
			abruptly at a dam that we must walk across or around. From here we	
			will follow the scenic and adventurous off-trail route used by rock	
			climbers to reach the start of their climbs up Table Dome or Elephant	
			Dome, the largest granite massifs in the Coyote Mountains. We will	
			follow cairns, do some rock hopping, and occasionally some	
			bushwhacking uphill deeper into the canyon until we reach the rock	
			climbers' junction to the two domes. We will take the right route,	
			ending our hike out by angling up a rock slab toward the south side of	
			the Elephant, and then return the way we came. Although the distance	
			and elevation gain on this hike are not great, backcountry rock	
			hopping and above average hiking skills are required. Dress

		Samaniego	continues up Samaniego Trail #7, Trail #6, Trail #5, and Trail #5A to	
		Ridge Trail	Mt. Lemmon. The Samaniego Trail passes Mule Ears along the way	
			and proceeds along the backside of the three peaks of the Samaniego	
			Ridge. This is a beautiful hike with great views of the Reef of Rocks	
			as viewed from Mule Ears, as well as the entire CDO Canyon	
			watershed originating from Mt Lemmon. This all-day hike is very	
			difficult and intended only for very fit hikers. The trail to Mule Ears	
			and Samaniego Ridge is seldom used and may be slow going at places	
			so be prepared for some bushwhacking. Minimum 4 liters of water,

			begins at the end of Scenic Drive from a little chapel called Sanctuary	
			Cove. There is no official trail, but faint paths, sometimes with loose	
			footing, can be taken to the top. As we climb, Panther Peak will	
			become visible there are excellent views of the foothills and higher	
			peaks of the Tucson Mountains and the park. We climb severely on	
			the final ascent with narrow traverses, rock climbing, and significant	
			exposure, which makes this hike quite difficult for its rating. If you do	
			not like exposed heights, this hike is not for you. Hikers can sign the

DRIVING DIRECTIONS

Agua Caliente Hill Trail. Drive east on Tanque Verde Road to N. Soldier Trail Road. Turn left on N. Soldier Trail Road and go to Ft. Lowell Road. Turn right and follow Fort Lowell Road which becomes Camino Ancho. Stay on Camino Ancho to Camino Remuda and turn left. Follow Camino Remuda north to parking lot for the Aqua Caliente Trailhead.

Anza Trail / Rio Rico Section. Take I-19 S. to Exit 17 (Rio Rico Drive) and go left (east). Follow the road toward Rio Rico Country Club until it crosses the Santa Cruz River, and turn immediately to the left onto the dirt road. Park in a small turnout next to the main road, and the trailhead is directly to the north.

Aravaipa Canyon – West Entrance. Take Hwy 77 north through Mammoth. Turn east off Hwy 77 at mile marker 123, 8.7 miles north of Corkers One Stop (just beyond the blue camping sign). Aravaipa Road is the at the Central Arizona Community College/Aravaipa sign. Drive 4 miles on paved road and 7.7 miles on well graded dirt road to the trail head, which is about 2.5 miles beyond the ranger station.

Aspen – Marshal Gulch Loop Trail. Take Tanque Verde Road to the Catalina Hwy and follow past Mile Post 22 to a trailhead for the Sunset Trail. Follow that trail 1.6 mile to Marshall Gulch, where signs mark the two trails. There is also road access from the town of Summerhaven on Sabino Canyon Parkwaysouth to the trailhead.

Arizona Trail: Italian Trap Trail. Drive east on Tanque Verde road to the end of the pavement. Just past the intersection with Wentworth Road, the road becomes Redington Pass Road, which a short distance later turns into a dirt road. Drive 7.3 miles on dirt road, just past milepost #10 stopping at Staging Area #2 for a bathroom break. The hike continues 2.5 miles (passing the Bellota Ranch road to the left, and passing milepost #12) to a sign marking FR # 37. The trailhead and a small parking area are on the right. It is 9.8 miles from end of pavement to the trailhead.

Atascosa Peak/Lookout Trail. Take I-19 to AZ 289 north of Nogales. Follow 289 toward Pena Blanca Lake for about 9 miles to an intersection with Forest Road 39. Continue west on FR # 39 to the trailhead.

Babad Do'ag. From Speedway and Campbell, head east on Speedway Blvd for 5.0 miles. .Turn left at N Wilmot Rd. and follow for a half mile. .Wilmot turns into Tanque Verde Red. Continue on E Tanque Verde Rd for 3.8 miles. .Turn left at Catalina Hwy and follow for 7.1 miles to the Babad Do'ag Vista parking lot.

Baboquivari (East Side). From Tucson, head east on I-10 and merge west (right) onto 1-19. Travel on 1-19 until you turn west (right) on Highway 86 (Ajo Way). Stay on Highway 86 to Three Points. At Highway 286 turn South (left) and remain on this road for approx. 28 miles. Take your first right after milepost 16 on to a dirt road. Remain on this road until you get to a fork in the road, and turn right. Continue down dirt road about 8 miles or until you get to a gate that is labeled Baboquivari Peak Hike. Park your car here.

**The dirt road is a private road to a ranch that allows access to the trail, so please respect the land and property.

Baboquivari (West Side). From Tucson, head east on I-10 and merge west (right) onto 1-19. Travel on 1-19 until you turn west (right) on Highway 86 (Ajo Way). Stay on Highway 86 to Sells and the turn south on Indian Route 19. About ¹/₄ mile after leaving Highway 86, Route 19 passes a Bashas store, bends east, and then turns sharply south at a "T-shaped" intersection. 10 miles south of Sells, between ¹/₂ and ³/₄ mile past the Topawa School on the right, turn left (east) on Indian Route 10 (dirt/gravel).

Permits may be obtained at no cost from the Tohono O'Odham Nation Agency located at the intersection of Routes 19 and 10.

Follow Route 10 for about 15 miles to the Baboquivari Camp (also called Gu Kui Chuchg on some maps). The road is more or less straight but turns into the "Foothills Truck Trail" about 3 miles short of the camp. The camp is a day use camping area with flush toilets. The trailhead is at the eastern end of the camp (at UTM 440400, 3516300).

Bill Cody Loop. In Oracle, turn right on Mt. Lemmon Highway . (Look for signs to Oracle State Park.) About ¹/₂ mile after the road becomes dirt, turn right onto American Flag Ranch Rd. The trailhead is about 1/8 mile on the right.

Brown Canyon. From the exit off I-19, drive west on AZ. Hwy # 86 to Three Points, then go southwest onto Route 286. There are restrooms behind the store at the junction of 86 and 286 (drive sround back to them). Take Route 286 to mile post 21. The U.S. Fish and Game Dept. guides will be waiting here. You then drive another 5.6 miles on dirt road, across some streams that require high clearance vehicles, to the trailhead for the hike.

Brown Mountain. Take Speedway west from I-10. Speedway eventually becomes Gates Pass Blvd. Continue onto W Gates Pass Blvd for 4.8 miles. Turn right at Kinney Rd and follow for 2.4 miles. Turn into the Juan Santa Cruz Picnic Grounds, just before the Arizona-Sonora Desert Museum. The unmarked trailhead is at the southern-most tip of the parking area.

Bug Springs. From Speedway and Campbell, head east on Speedway Blvd for 5.0 miles. Turn left at N Wilmot Rd and follow for a half mile. Wilmot turns into Tanque Verde Red. Continue on E Tanque Verde Rd for 3.8 miles. Turn left at Catalina Hwy and follow for 12.2 miles to the Bug Springs Trailhead.

Butterfly. Take Tanque Verde Road to Catalina Hwy and follow past Milepost 19. The trailhead is just before the Palisade Visitor Center. The trailhead at the north end is just past Milepost 22.

Charouleau Gap Road Hike from Oracle. Turn right into Oracle on American Ave. Drive 1.7 miles on American Avenue and turn right onto College Road (just before while mission church on the right). Take the first left onto Maplewood Street. Drive .2 miles and turn onto Estill Drive. Drive 0.4 miles on Estill Drive to Viento. Turn right. Drive 0.2 miles and turn right onto Callas Road (a.k.a Charouleau Gap Road). Drive 0.2 miles on Callas to end of pavement and gate. Open gate and drive through, closing gate. Either park here or drive 0.2 miles on FS # 736 (it bears to the right) and park to the left of the road. High clearance vehicle not needed if you park at the gate. Mileage from # 77 to parking is 2.9 miles. Total RTD is 40 miles.

Bog Springs – Kent Spring Loop Madera Canyon. From Tucson, go south on I-19 to Green Valley; take the continental exit. Continue 13 miles southeast and south to Madera Canyon. Drive into the canyon and watch for the signed Bog Springs Campground on the left. A parking lot and trailhead are just a few yards beyond. Follow a trail east and then southeast roughtly a mile to the beginning of the loop portion of the route.

Chiracahua National Monument. Follow I-10 to Willcox and exit onto AZ 186. Follow AZ 186 southeast about 30 miles to a signed turnoff for the monument.

Douglas Spring. From downtown Tucson, take Speedway Blvd Eastbound toward the Rincon mountain range. Speedway dead-ends at the trailhead.

Elephant Head. Take exit 56 off of Interstate 19 south of Green Valley. Go to the eastside of the highway (under the freeway). Go south on the frontage road 3 miles and turn left onto Elephant Head Road. Go east to the Mt. Hopkins road turnoff. Follow the paved Mt. Hopkins road 5.5 miles to the Agua Caliente Canyon Road. Turn left onto this dirt road and follow it approximately 2.5 miles to the parking lot opposite the sign "Dead End 2 miles." The Aqua Caliente Trailhead is 50 yards west of the parking lot. A 2-wheel drive vehicle can easily get within 200 yards of the trailhead.

Finger Rock Trails (including Pontatoc Canyon and Ridge). At the corner of Sunrise Blvd, and Swan Rd., head north up swan, until you reach Skyline Rd., and make a left (west). Continue west on skyline until Alvernon Way and make a right (North). Take Alvernon Way North until it dead ends on the left into the parking lot and trailhead.

Hidden Canyon – Starr Pass. Drive west on 22^{nd} Street, which becomes Starr Pass Blvd. As you approach the JW Starr Pass Resort and Spa, turn right onto the Service Drive. Follow the drive 0.4 miles to the unsigned trailhead on the right near a mesquite tree. There are two large stones marking the trailhead about 6 feet off the road. Park on the road.

Honey Bee Canyon. Take Oracle Rd. north from Ina about 7 miles to Rancho Vistoso Blvd., go left (west) 3.1 miles to a very nice parking area on your left (you will need to make a U turn around the median). At the parking lot are bathrooms, water fountain, and a few small tables. There are two trails leading from the parking lot, one heads south past the bathrooms and the other North, underneath the Rancho Vistoso Blvd. Bridge.

Italian Trap Trail. To reach this segment of the Arizona Trail, one must drive east on Tanque Verde road to the end of the pavement. Just past the intersection with Wentworth Road, the road becomes Redington Pass Road, which a short distance later turns into a dirt road. Drive 7.3 miles on dirt road, just past milepost #10 stopping at Staging Area #2 for a bathroom break. The drive continues 2.5 miles (passing the Bellota Ranch road to the left, and passing milepost #12) to a sign marking FR # 37 (do not take FR # 37). The trailhead and a small parking area are on the right. It is 9.8 miles from end of pavement to the trailhead. Look to the southeast for the trailhead.

Kings Canyon Trail to Wasson Peak. From Tucson, follow Speedway over Gates Pass to its junction with Kinney Road. Turn right, follow Kinney until you reach the Sonora Desert Museum. Parking and trailhead are 0.1 miles passed the museum entrance and across (North) the road.

Madera Canyon. From Tucson, take I-19 to Green Vally and get off at the Continental Exit. Continue southeast to Madera Canyon and the Proctor Parking Area.

Mt. Wrightson, Baldy and Super Trails. From Tucson, follow I-19 south to Green Valley, take the Madera Canyon exit (63) to Continental Rd. Turn left at West Continental Rd and follow for 1.2 miles. Take the 3rd right onto Madera Canyon Rd/White House Canyon Rd and continue to follow Madera Canyon Rd for another 13 miles to the trailhead.

Panther Peak. From I-10, take W Ina Rd 2.8 miles. Turn left at N Wade Rd which takes a slight right onto W Picture Rocks Rd after half a mile. Following W Picture Rocks Rd for 3.5 miles you will see a dirt road that takes you to the Cam-Boh picnic area.

Pima Canyon. From Tucson drive north on Oracle Road (US 89) until it intersects Magee Road. Turn right (east) on Magee Road. Magee Road dead-ends at a parking area. The Pima Canyon Trailhead, also known as the Iris O. Dewihirst Trailhead, begins at the east end of the parking lot.

Roger's Trough, Superstition Wilderness. Drive to Florence Junction via Hwy # 79 to U.S. Hwy # 60. Turn right on U.S. Hwy # 60, and go about 2 miles. At Queen Valley Road, turn left (north) and go 1.8 miles. At FS # 357, turn right and go about 3 miles. At FS # 172, turn left and go about 10 miles. At junction with FS # 172A, turn right and go 3.9 miles to the Reavis Ranch Trailhead.

Sabino Canyon and Bear Canyon Trails. From the south, take Tanque Verde Road to Sabino Canyon Road and follow north about four miles to the Visitor Center. From the north and west, follow Ina Road, SkylineDrive, and Sunrise Drive to Sabino Canyon Road. Turn left and the Visitor Center entrance is 100 yards on the right.

Sendero Esperanza Trail to Wasson Peak. From Tucson head west on Ina Road. Go past the interstate and stay on Ina until you will take a left onto Wade road. This road will take you over a pass in the mountain range and it

becomes Picture Rocks Road. After the pass, go a few miles until you reach Golden Gate road. Take a left onto it (it is a dirt road). After about 10 minutes you will reach the trailhead on the left side of the road. Just beyond the trailhead parking lot is a picnic area as well.

Soldier Trail, Lower trailhead. The trailhead is located on the north side of the Catalina Highway about a mile from the bottom of the mountain. Upper trailhead: Drive up the Catalina Highway to the turnoff into the Gordon Hirabayashi Recreation Site (Old Prison Camp) beyond milepost 7. Turn left and follow the road to a closed gate that marks the trailhead.

Sweetwater Preserve. The trailhead is located at 4000 North Tortolita Road south of El Camino del Cerro. It is about 2.5 miles west of I-10.

Sweetwater Trail. Follow I-10 (exit 252) and/or the Frontage Rd. to El Camino Del Cerro/Ruthrauff Rd. Turn west on El Camino Del Cerro and follow for 5.7 miles (from I-10 exit 252) to its end at the Sweetwater Trailhead.

Tanque Verde Ridge Trails. From downtown Tucson, follow Speedway Boulevard east to Houghton Road. Turn right and go about 3 miles to Old Spanish Trail. Go another 2.8 miles to the entrance of Saguaro National Park. After passing the toll booth, turn right and head towards Javelina picnic area. The trailhead is near the entrance to the picnic area.

Trailhead for Tortolita's – **Off Rail X.** Look for Rail X road which is on the right hand side of Oracle Road, just south of the intersection with SaddleBrooke Boulevard. Drive exactly 5.6 miles on Rail X road (look for a white gate and cattle guard). Turn right immediately after the white gate and cattle guard. Drive 0.1 mile and bear right on a Jeep road. Drive exactly 1.1 miles and park in a wide wash area where other cars have parked in the past.

Note: if a high clearance vehicle is not available to drive on this last 1.2 mile section of Jeep road, park at the large corral (Crow Corral) and walk the Jeep road.

Ventana Canyon. Follow Kolb Road north until you reach the Loew's Ventana Canyon Resort. Enter the resort and look for the employee parking lot on the left side of the entrance road. There is a sign designating the upper portion of the parking lot for hikers.

Yetman Trail. From Speedway and Campbell drive 7.1 miles west on Speedway past I-10 to where Speedway intersects with Camino de Oeste. Turn left (south) on Camino de Oeste. Follow Camino de Oeste south as it turns into a dirt road then dead-ends at the trailhead parking lot.
